

US006125226A

# United States Patent [19]

Forrest et al.

[11] Patent Number: 6,125,226

[45] Date of Patent: Sep. 26, 2000

[54] **LIGHT EMITTING DEVICES HAVING HIGH BRIGHTNESS**

[75] Inventors: **Stephen R. Forrest; Paul Burrows; Dimitri Z. Garbuzov**, all of Princeton, N.J.

[73] Assignee: **The Trustees of Princeton University**, Princeton, N.J.

[21] Appl. No.: **08/844,353**

[22] Filed: **Apr. 18, 1997**

[51] Int. Cl.<sup>7</sup> ..... **G02B 6/10; H01J 1/62**

[52] U.S. Cl. ..... **385/131; 313/504; 313/506**

[58] Field of Search ..... **385/131, 901; 313/502-509**

## [57] ABSTRACT

Light emitting devices comprising a transparent substrate, a reflective layer on the substrate having at least one opening therein, a waveguiding layer on said reflective layer, and at least one OLED on the waveguiding layer for emitting light of a predetermined color. The light emitted from each OLED is directed through the at least one opening in the reflective layer for emission through the substrate.
